SUMMARY

Business Analyst with experience in transforming data into actionable insights using **SQL, Python, Power BI, Excel, Tableau and Microsoft Fabric**. Analyzed **50,000+ records**, automated reporting workflows, developed KPI dashboards and supported data driven business decisions through **Data Analysis, Visualization and Business Intelligence Reporting**. Microsoft Certified in **Power BI Data Analyst (PL-300)** and **Fabric Analytics Engineer (DP-600)**, with experience in **stakeholder reporting and analysis**.

EXPERIENCE

Business Analyst – Holiday Channel
Remote, US | Jul 2026 – Present

- Developed **Power BI dashboards** for management by consolidating vendor, marketplace, sales, inventory, fulfillment, returns and performance data into actionable **KPI reporting** for business decision making and operational planning.
- Automated weekly social media analytics across **8 platforms and 34 accounts** using **Python APIs**, reducing manual reporting effort by **83.3%** while maintaining six months of historical performance data for management review.
- Analyzed and compared weekly **follower growth, reach and engagement metrics**, transforming API data into management ready **Power BI dashboards** for cross platform performance tracking, trend analysis and data driven decision making.

Data Analyst – UMass Auxiliary Enterprises
Amherst, MA | Sep 2024 – May 2026

- Analyzed **Financial transactions, Sales, Inventory and Customer Purchasing Data** across UMass Dining to identify purchasing patterns, monitor revenue trends and support inventory planning and operational decisions across multiple locations.
- Developed **Power BI and Excel reports** to monitor sales and financial KPIs, translating stakeholder requirements into actionable insights and improving visibility into business and operational performance for management teams.
- Evaluated customer purchasing behavior and operational trends using **SQL, Python and Data Visualization**, delivering recommendations that supported product availability, customer experience and overall business performance improvements.
- Performed **Data validation, Trend analysis and Reporting** across operational datasets, identifying inconsistencies and recurring patterns to improve reporting reliability and provide stakeholders with timely business insights for decision making.

PROJECTS

Health Insurance Premium Prediction
Python, XGBoost, Scikit-learn, SQL

- Analyzed health insurance data using **SQL and Python** and compared Linear Regression, Decision Tree, Random Forest and XGBoost models across **10+ demographic and medical risk factors** to evaluate predictive performance.
- Selected XGBoost as the strongest performing model with an **R^2 score of 0.84**, applying feature engineering, model evaluation and visualization to identify key premium pricing drivers and improve predictive accuracy.

Airbnb Demand & Availability Forecasting
Python, Pandas, Random Forest, Time-Series Analysis

- Analyzed **50,000+ Airbnb listings in Amsterdam** using Python and Pandas to identify seasonal demand, pricing, availability, occupancy patterns and revenue opportunities across different periods and market conditions.
- Engineered seasonal features and developed forecasting models, identifying **higher prices and lower availability during holiday seasons** compared with substantially lower pricing during off season periods across the Amsterdam market.

Inflation & Pantry Demand Analysis
Power BI, Power Query, DAX, Data Visualization

- Developed an interactive **Power BI dashboard** combining Amherst Survival Center pantry data with Boston CPI data to analyze inflation trends and changes in community food assistance demand over time across multiple periods.
- Applied **Power Query, DAX, data modeling and KPI visualization** to compare economic conditions with pantry demand and communicate trends through stakeholder focused business intelligence reporting for clearer data driven insights.

SKILLS

Programming:	Python, SQL, Excel(Pivot Tables, XLOOKUP), R, Pandas, NumPy, Scikit learn, Matplotlib, Seaborn
BI & Visualization:	Power BI, DAX, Power Query, Tableau, Microsoft Fabric, KPI Reporting, Data Storytelling
Data Analytics:	Data Analysis, Data Visualization, Predictive Analytics, Statistical Analysis, Trend Analysis, EDA
Data Management:	Snowflake, Data Modeling, ETL, Data Cleaning, Data Transformation, Data Validation, Data Warehousing
Tools & Business:	DeltaLake, OneLake, Git, Streamlit, Requirements Gathering, Stakeholder Management, Process Improvement

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate | Microsoft Certified: Azure AI Fundamentals
Microsoft Certified: Fabric Analytics Engineer Associate | Silver Medal – The Joy of Computing with Python, IIT Madras

EDUCATION

Master of Science, Business Analytics
Sep 2024 – May 2026

University of Massachusetts Amherst, Isenberg School of Management — *GPA: 4.0 / 4.0*

Bachelor of Technology, Artificial Intelligence and Machine Learning
Nov 2020 – Aug 2024

Jawaharlal Nehru Technological University Hyderabad
